

# **D'Life HOME INTERIORS**

An Online Interior Design Management System

## **SYSTEM OVERVIEW**

D' Life Interiors is an online Interior Design Management System developed for managing various interior designs. This project deals with managing interior designers and clients. The system keeps track of the latest interior designs, and client data and requirements. The system reduces lot of work for customers as well as owners.

## **SYSTEM STUDY**

Existing system is an automated system. The clients can view various interior designs of a company according to their requirements and packages. Customers can contact designer companies directly. The drawbacks of the present system are rectified by proposed system. The proposed system can manage various companies within a single system.

## **Drawbacks**

- More time consuming
- Chance occurring errors
- Human effort is needed
- Not secure

## **PROPOSED SYSTEM**

The proposed system is defined to meet all the disadvantages of the existing system. It is necessary to have a system that is more user friendly and user attractive for business growth. In our proposed system admin can view user's requests, can add product designs, and can add teams. Admin can manage the system by deleting or updating or adding the products and teams.

Users can view the product categories which include designs according to their needs. User can request teams and if the request is approved by the admin then an email is sent to the user mail account. User can also choose required designs within their budget.

## **TYPES OF USERS**

- ADMIN
- TEAMS
- USER

## **MODULES**

### **ADMIN**

- Add Teams
- View product categories
- Accept request for team
- Sent notification to team
